
GenePlanet launches a Next-Generation DNA Sequencing Centre

The state-of-the-art laboratory will analyse DNA samples from 30 different countries

Ljubljana, 15 February 2019 – GenePlanet, a global provider of innovative healthcare and lifestyle solutions based on preventive genetic testing, has established its new **Next-Generation DNA Sequencing (NGS) Centre** in Zagreb, Croatia. The new laboratory has been set up in cooperation with Polyclinic Breyer, a leading Croatian laboratory, with a long tradition and vast experience in the field of clinical laboratory testing.

GenePlanet's Next-Generation DNA Sequencing (NGS) Centre will be a central hub for **DNA samples from 30 different countries**. It represents the biggest private investment into NGS testing in the region and is a new chapter in terms of science and development. Polyclinic Breyer will enable the operation of this centre in a state-of-the-art laboratory operating under ISO15189, fulfilling the highest quality standards.

We are bringing a breakthrough technology to the region and the new laboratory will be a beacon for the diagnostic sector and will benefit many people.

The main goal of the sequencing centre is to bring multiple products and services based on NGS testing, ensure short turnaround times for analysis while maintaining industry-leading quality.
